UNLOCK SMARTER WITH SALTO

SALTO
inspired access

The SALTO Neox Padlock G4 offers a unique solution ideal for utility providers – electric power stations, telecom network services, industry applications, and more – and property services that need an additional level of security to control specific doors like gates or storages, without losing a piece of convenience and control.

Built to withstand every application, tested and approved, the SALTO Neox G4 is a padlock you can rely on when you're out in the field in any type of application. Robust and durable, this electronic padlock features IP68 water resistance and dust protection for harsh environments and extreme climates, to shield it from the elements.

RISCO LIGHTSYS+ DOOR ACCESS CONTROL

The new LightSYS+ from RISCO is already packed full of features but soon these features will be enhanced even more with the release of Door Access Control.

NEW FEATURE - COMING SOON!

Using the newly developed RISCO Prox reader, which is connected to the RISCO Bus, users will be able to control up to 32 doors. The readers will be automatically assigned to the panel according to the serial number on BUS (no dip switches) making connection and setup seamless.

Users will be able to arm and disarm the system using an RFID tag. 3 badge arming allows the User to Arm a partition by presenting an RFID Tag card at a reader three times within a short period of time and disarming the system by presenting an RFID Tag once to open the door and Disarm the specific Partition.

Other functions in the new Door Access control feature include:

- Door Control Time - defines the time between when the user passes the proximity tag on the reader till the doors locks again. Enter the Pulse time (in second) to define door opening time
- Defining the user output from the output list
- Door Open Too Long (DOTL)
- Door Control Schedules

Stay tuned for more updates on the release of this great new feature for LightSYS+.

BORG LOCKS MARKET LEADER

BORG Locks are the market leader in innovative design and manufacture of high-quality mechanical push button access control.

The BORG ECP range is designed to eliminate traditional code changing issues by being able to change the code on the door in seconds.

No tools required, no need to remove the lock from the door, by simply using the change key you can effortlessly change the code in seconds.

Did you know

Each BORG ECP lock comes with blocking pins, if installed it disables the on-door code change feature. Also the BORG 5000 Series ECP locks come with a separate blocking pin to deactivate the passage function.

SECURELY SHARE ACCESS WITH ABUS

Our KeyGarage™ 787 Smart-BT for wall mounting is a great option for holding up to 20 keys, three car keys or up to 30 plastic cards on a temporary and flexible basis for various groups of people.

As an administrator; You can generate a six-digit code and share access for people without the use of a smart phone; e.g. for guests in a holiday rental, trade services, cleaners, care givers and more.

Alternatively you can share access by sending an electronic ticket via the app, allowing access with a smart phone. The ABUS Bluetooth KeyGarage has the most current secure AES-128-Bit encryption.

CASE STUDY

THE CHALLENGE

With South Australia's Sunrise Christian School covering seven locations, managing access was a cumbersome and time-consuming challenge.

Bradyn March, IT Manager of Sunrise, explains why a new solution was required, "Most central services staff were carrying 6-8 keys. When a key was lost, we faced the costs of replacing the key or the entire lock. It was a costly and time-consuming process, and risk management is always a big concern."

Travel time was also a contributing factor, as well as managing the security of the regional campuses which offered use of facilities to community groups.

It was important for Sunrise to be able to manage access remotely while maintaining a clear view of who was using the facilities, and when.

THE SOLUTION

The solution selected by Sunrise is the SALTO Space SVN data-on-card and wireless solution. This access control system is networked through Bluetooth Low Energy (BLE) and is specially designed for doors where real-time control is required. It provides control and management of all access points remotely.

Locks that are not required to be online in real time or are out of range of a wireless receiver, can still operate in offline mode via SALTO's data-on-card technology, where the users' access information is stored in an encrypted format on the smart card with online wall readers able to update (and receive information from) the cards. The school also takes advantage of SALTO's JustIN Mobile app which allows them to securely and conveniently send digital keys over-the-air (OTA) to registered and verified smartphones via the ProAccess Space software.

The products selected by Sunrise are the XS4 One, XS4 One Mini handle sets, SALTO Neo Cylinders as well as the SALTO Neox Padlocks. There are several hard-wired perimeter access points complementing a system that is otherwise wireless.

XS4 ONE

NEO CYLINDER

NEOXX PADLOCK

SMART ACCESS AT SUNRISE CHRISTIAN SCHOOL

KEY BENEFITS

- The ability to automatically secure doors at the end of the day, and to control access between certain times, across different users and groups. This has saved time and strengthened security
- Considerable savings in the costs associated with rekeying and changing locks when mechanical keys are lost, as well as staff time
- A much less cumbersome system. Staff who regularly travel across all the campuses now only need to carry one fob, instead of multiple keys, and where required can be granted access almost instantaneously
- Audit trails and reporting enable Principals to see how the campus is being used, by who and when, ensuring peace of mind

XS4 MINI - ANSI

Bradyn was thrilled to find an unconventional yet effective use for the Neox Padlock beyond gates and sheds – they now also secure the schools' iPad Trolleys.

KIDDE TOUCHPOINT KEY CABINETS

The Key Cabinet Pro is a unique heavy-duty steel key cabinet. This model has an easy-to-use TouchPoint® Pushbutton lock that combines convenience and security.

- Key storage cabinet
- Includes key tags & key rings

NEWS AND EVENTS

MLAA NZ BRANCH MEETING

The latter half of May was a busy time with the MLAA NZ branch meeting held at the Richmond Yacht Club in Auckland. This was a well-attended event and we heard more about the training of apprentice locksmiths. It was a shame that the main sponsor of the event failed to show up.

The next morning, we hosted a breakfast for all our customers and their staff. We had customers from all parts of NZ and it was great to catch up with everybody. This was a great success, keep your eyes open for another event. The next one will have a brief product training /presentation. These are worthwhile, as it allows the people from the industry to mix and mingle and catch up with friends and acquaintances that you rarely get to see.

FACILITIES INTEGRATE

By the time you read this, the Facilities Integrate Expo would have been held. This is a great event, with a wide cross section of people interested in security of all aspects. There are always some very interesting and new products being presented and an audience willing to engage with the exhibitors.

LSC has exhibited at this event since its inception, and we have seen it expand over the years to become a major event on each year's calendar. If you missed this year's event, be sure to keep your eye out for next year's event and hopefully, we'll see you there.

IN MEMORIAM

CELEBRATING THE OF
FRANCIS BRUCE BETHELL

October 4th 1948 - June 19th 2022

It is with much sadness that we announce the passing of Bruce Bethell.

Bruce was one of our Industries more colorful characters, who always had a yarn to tell and joke to crack.

It was always a pleasure to deal with Bruce and he regularly had the office and our Account Managers in stitches with many an inappropriate but extremely humorous comment.

RIP mate, you will be missed and as you would always say "Have a pretty day"

HAPPY CUSTOMERS

FARRAND & MASON (DARGAVILLE)

Pictured here is Kevin Mason, owner of Farrand & Mason in Dargaville. Kevin has recently invested in the latest Silca Futura Software subscription to keep him completely up-to-date and able to meet all of his customers key cutting needs. Looking good Kev!
